

moveQuest™

The game that turns real-life activities into your digital playground

MoveQuest is Built Like a Blockchain,

It's not a blockchain, but it's built like one: a self-sustaining ecosystem where activity creates value. Movement, participation, and engagement power growth. No constant inflow of new money. The community builds it. The system sustains itself. Everyone benefits.

MoveQuest is a Lifestyle and a Movement

Powered by Proof of Physical Activity (PoPA), every step, workout, mile, calorie burned, and even sleep contributes to your journey. The healthier you become, the wealthier you grow.

This is where movement becomes motivation and health becomes your greatest asset.

MoveQuest Tokenomics

MQT Max Supply: 21,000,000

Feb 9, 2026 Circulating Supply: 195,648

MoveQuest doesn't *pay rewards* — users **mine tokens** through Proof of Physical Activity (PoPA).
Distribution adjusts dynamically based on participation, activity, and ecosystem balance.

As activity increases, distribution adapts.

As usage grows, tokens recycle back into the system.

No fixed payouts. No runaway inflation.

This isn't earning from hype — it's mining from movement.

MoveQuest Ecosystem

The MoveQuest ecosystem is a fully integrated, activity-driven system where every action has utility. Users mint, dock, evolve, and boost miners, submit Proof of Physical Activity (PoPA), and mine MQT through movement. Tokens cycle back into the ecosystem through upgrades, staking, farming, leasing, challenges, and events.

Mining is dynamic, participation-based, and managed by smart contracts.

No single action stands alone — every feature supports balance, sustainability, and long-term growth.

MoveQuest Ecosystem

MoveQuest Ecosystem

Mint Miners

Create miners that generate mining power used to mine MQT through activity.

Dock Miners

Activate miners by placing them into available dock slots to begin mining.

Evolve Miners

Upgrade miners to increase efficiency, power, or long-term value.

Boost Miners

Temporarily enhance mining power through in-app actions and features.

Submit PoPA

Submit Proof of Physical Activity to validate movement and enable mining.

Claim MQT

Claim mined MQT tokens earned through verified activity.

MoveQuest Ecosystem

Hatchery: Stake & Farm MQT

Lock MQT into the ecosystem to earn mining bonuses and long-term rewards.

Incubator: Mint Vanguard Miners, Farm .0001 MQT per MQT spent

Crypto back hatchery that provides steady farming rewards for 222 days.

Nest: Pre-entry to Golden Hatchery, Farm .0003 MQT per MQT staked

Entry into the Golden hatchery offering increased farming rewards for 10 days.

Golden Hatchery, 5 tiers of farming options

Premium hatchery delivering compounding farming rewards.

MoveQuest Ecosystem

Tier 1

Farming Reward: .0005 per MQT staked. Duration: 30 days

Tier 2

Farming Reward: .0009 per MQT staked. Duration: 75 days

Tier 3

Farming Reward: .0015 per MQT staked. Duration: 135 days

Tier 4

Farming Reward: .0022 per MQT staked. Duration: 210 days

Tier 5

Farming Reward: .0032 per MQT staked. Duration: 323 days

MoveQuest Ecosystem

Phantom Miners

Free, time-limited miners that allow anyone to start mining without an upfront cost for 135 days.

Qchips – Pay as You Go

Utility chips that let users pay for Trailblazer and Explorer miners over time. Qchips are purchased at submission, allowing miners to be assembled gradually without upfront cost.

Lease Miners

Miners are digital real estate and users can rent their undocked miners to others.

Challenges

Time-based goals that incentivize activity, consistency, and engagement.

Events

Special ecosystem activities offering unique rewards and participation bonuses.

MoveQuest Ecosystem

MQT Blockchain

A dedicated hybrid blockchain powering the MoveQuest ecosystem, designed with dual smart contract capability and a lightweight node system for efficiency and scalability.

MQTPay

A full-function non-custodial wallet that supports storing, sending, swapping, buying, selling, and bridging tokens. Built with advanced safety features that automatically flag phishing links, fake requests, and malicious activity.

Dynamic Mining

A distribution system that adjusts mining output based on activity and balance.

MoveQuest Direct Affiliate Commissions

Direct Affiliate Commissions

Participants may earn direct commissions from community sales made through their activation code or referral link, which is tied to their wallet address and paid instantly by smart contracts.

Trailblazer and Explorer Miners - Community

50% direct commission is paid on all Trailblazer and Explorer Minted Miners

Influencer Sales

Up to 30% commission is paid on dock slot 2 - 10

Dock Slots 2 - 18 - Community

1 Vanguard Miner is rewarded when 18 dock slots have been unlocked.
